

## FINKE RACING WELCOMES NGK SPARK PLUGS (USA), INC. TO THE TEAM FOR 2018

Finke Racing is proud to announce their partnership with NGK Spark Plugs (USA), Inc., for the 2018 race season. As the crew begins preparing for their 21-race nationwide tour, they look forward to utilizing and educating the public on the range of NGK products that are available for both on-track and off-track use.

“NGK is more than spark plugs for race cars. As awesome as it is to represent a leader in the performance industry, we are equally excited to help raise awareness on their technology outside of the drag racing community. However, their products have been instrumental to our team’s success over the past decade and it is important for us to stress this point.” – Jackie Fricke, driver of the 2015 McKinney Chassis Injected Nitro Top Alcohol Dragster.

NGK Spark Plugs (USA), Inc., joins Finke Racing along with other leaders including Lucas Oil Products, Inc., the Wirtgen Group, JE Pistons, Doosan, VP Racing Fuels, Quik-Latch Products, ISC Racers Tape, Manley Performance Products and MAHLE.

### About NGK Spark Plugs (USA), Inc.

Since 1936, NGK Spark Plugs has been the world leader in technology, innovation, and world-class quality in the design of spark plugs and oxygen sensors. Their commitment to excellence continues to be the driving force behind the company’s advanced research and development programs. Ceramics, at the core of superior spark plug technology, spawned the creation of NTK Technical Ceramics. Additional lines of products followed; NGK Wire Sets, NTK Oxygen Sensors, NTK Knock Sensors and a variety of other NTK sensors. Today, the company manufactures spark plugs and oxygen sensors for virtually every automotive manufacturer in the world, and has set some groundbreaking industry firsts along the way.
