

HEDMAN HEDDERS JOINS FINKE RACING

Finke Racing is excited to announce their recent partnership with Hedman Heddors (Hedman Performance Group).

“Hedman Heddors has had a reputation in drag racing for a very long time, and I am thrilled that they think so highly of our race team. We look forward to promoting their extensive line of products (more than just headers) to our fans and other racers,” explains team driver, Jackie Fricke.

Fricke adds, “We have just put the finishing touches on our brand new 2019 Copeland Race Cars Injected Nitro Top Alcohol Dragster, and

the support of the Hedman Heddors staff throughout this process has been fabulous.”

Hedman Heddors joins Finke Racing just as the crew heads into a busy two-month stretch of racing, kicking off at the upcoming NHRA Lucas Oil regional event at Virginia Motorsports Park and ending out on the west coast at The Strip at Las Vegas Motor Speedway. Finke Racing currently sits 6th nationally and is ranked 4th in the NHRA Lucas Oil East Region standings.

Hedman Heddors (Hedman Performance Group) joins Finke Racing, who is also supported by Lucas Oil Products, Inc., the Wirtgen Group, NGK Spark Plugs (USA), Inc., JE Pistons, Doosan, VP Racing Fuels, Quik-Latch Products, ISC Racers Tape, Manley Performance Products, MAHLE, and Clean Boost Products.

About Hedman Heddors and Hedman Performance Group

Hedman Heddors began as a one man shop in 1954. Bob Hedman, founder of Hedman Heddors, sold his highly sought after exhaust tubes to fellow racers on the salt flats of the Mojave Desert.

What started out as a way to make a few bucks to pay for Bob’s racing hobby quickly transformed into an opportunity to become the premier hedder manufacturer for both the racing and street hedder marketplaces. Originally designed for straight-line drag racers, word spread quickly about Hedman’s reputation for building hedders that provided the best boost in power for the dollar. It wasn’t long before Hedman Heddors was the brand of choice among racing’s elite engine builders, racers and race series.

Hedman Heddors constantly reshapes itself to meet environmental requirements and incorporates computer technology to ensure that its products offer the best performance improvement. Whether you’re a professional or sportsman racer, Hedman Heddors builds your hedder with one goal in mind: optimum performance. Even if you’re not a racer, the lessons Hedman learns at the track and on the dyno make it into every street hedder that the company designs.
